

LUCIE BEDOURET

FULL STACK DEVELOPER

PROFILE

A passionate MERN stack developer (MongoDB, ExpressJs, React/React Native, NodeJs) with a strong commitment to delivering high-quality solutions. Curious, and self-motivated, I adapt easily to new challenges and maintain clear communication with clients to ensure their needs are met. I thrive on collaborating with colleagues and take pride in making clients happy by delivering well-structured code and modern, functional applications. I excel in prioritizing and organizing tasks to meet deadlines, ensuring smooth project progression and successful outcomes.

EMPLOYMENT HISTORY

FULL STACK DEVELOPER

BECOMS (September 2024, Now)

- Developping skills on MERN, AuthO and AWS
- Meetings with clients for requirements gathering, popularization and feedback gathering

Currently attending a RAG training to conceptualize, build and monitor RAG applications with LangChain-Graph-Smith.

Project example :

With a teammate, developed a fashion model recruitment application. We were challenged by performance issues due to the large number of pictures and videos managed in the app. Today, one month after launch, we have successfully processed over **1,000 applications** with more than **4,000 media files saved**.

FULL STACK DEVELOPER – INTERNSHIP AND APPRENTICESHIP

BECOMS (May 2023, September 2024)

- Managing and contributing to **6** diverse projects for various clients.
- Developping skills on MERN Stack but also on Firebase, AuthO, Stripe and AWS implementations
- Meetings with clients for requirements gathering and feedback gathering

Project examples :

Contributed to the development of a loyalty program mobile application delivered on the App Store and Play Store for a famous French shoe brand. This app was developed alongside my apprenticeship supervisor using React Native with Expo. The app has accumulated over **30,000 installs** on the stores.
