14 rue René Cassin, 63100 Clermont-Ferrand, Auvergne, FRANCE

PROFILE

Full-stack developer building maintainable and efficient web applications using TypeScript (mainly React and Node.js). I'm passionate about solving real-world problems through clean architecture and thoughtful design, and I love turning complex challenges into simple, elegant solutions. I'm especially drawn to roles with strong product ownership and collaboration across teams. Always curious and eager to learn, I'm now looking to deepen my skills by working on high-impact projects with a global reach, in an environment that values transparency, autonomy, and continuous growth.

EXPERIENCES

09/2024 - Now

Fullstack developer (React & NodeJs)

Becoms

- Web application development using Typescript, React, MongoDB, Express.js, Node.js, Auth0, and AWS.
- Project management and leadership in production environments using agile methodologies. Regular live meetings with clients to gather requirements, explain technical concepts, and collect feedback.

Project exemple :

As part of a team of 4, developed a recruitment platform for fashion models. Despite performance challenges due to high volumes of photos and videos, the app successfully handled 2,000+ applications and **over 8,000 media files in its first month.**

05/2023 - 08/2024

Internship + Apprenticeship: Junior Web & Mobile Developer

Becoms

- Development of applications using React, React Native, Node.js, Express.js, MongoDB, and integration of tools such as Firebase, Auth0, Stripe, and AWS.
- Client meetings for requirements gathering and feedback.

Project example:

Contributed to the development of a mobile loyalty app for a major French shoe brand, published on the **App Store and Play Store with over 30,000 installs, using React Native (Expo) alongside my apprenticeship mentor.**

EDUCATION

09/2021 - 08/2024

Bachelor's Degree in Computer Science (Work-Study Program)

IUT Informatique, Clermont-Ferrand (Sept 2021, July 2024)

- Mobile Application Development Track (Kotlin, React Native, SwiftUI)
- CI/CD: (Docker, Kubernetes)
- Agile Project Management (Scrum)

01/2023 - 05/2023

Exchange Semester

UQAC

- Kotlin Development
- Machine Learning
- Advanced Mathematics

LANGUAGES

Français: Native

Anglais: B2 (850 TOEIC score)

HOBBIES

Chess

Weight Training

Animal Care
